

The Hruska Clinic™ is a unique Physical Therapy clinic that offers physical therapy services that are based on the philosophic and integrative concepts of the Postural Restoration Institute® (PRI). The clinic was founded and directed by Ron Hruska in 1999 and has grown into the multidisciplinary center that it currently is. The science and techniques taught through the Postural Restoration Institute® were first developed for clinical care here at the Hruska Clinic™. The clinic is still dedicated to growing and learning about the patterned neuro-biological human being.

Our staff is made up of 4 full time therapists along with the founder of the clinic, Ron Hruska, who works primarily as a consulting therapist. All of our therapists are passionate about and committed to addressing functional limitations through the assessment of neuromuscular patterns and treatment using PRI application, and interdisciplinary integration when necessary. The Hruska Clinic™ was the nation's first clinic to be a Postural Restoration Certified™ Center as certified by The Postural Restoration Institute®.
